#### 1. Introduction

The Reaching Agents of Change (RAC) project is a 3-year regional initiative aimed at increasing investments and commitment to the dissemination and use of Orange-Fleshed Sweetpotato (OFSP) as a means to combat Vitamin A Deficiency (VAD) and food insecurity in Africa. The project, which is coordinated from Nairobi, Kenya, is funded by Bill & Melinda Gates Foundation, and implemented by the International Potato Center (CIP) and Helen Keller International (HKI). The project targets the following countries: Mozambique, Nigeria, Tanzania, Ghana and Burkina Faso. The main objectives of RAC are to:

- 1) Generate new investments by governments, donors, and NGOs to scale up the adoption of OFSP in five target countries; and
- 2) Building the capacity of national implementing agencies to design and implement technically strong and cost-effective training interventions that drive up-scaling of OFSP.

One of the capacity building activities planned under RAC Project is to conduct an annual 10-day training course on "Everything you have ever wanted to know about sweetpotato". This is a Training of Trainers (ToT) course targeting extension staff and other interested people working with the public and private sectors, NGOs, CBOs and farmer groups.

The Department of Agricultural Economics and Agribusiness (DAEA) is in the Faculty of Agriculture (FoA) of Sokoine University of Agriculture. The center aims at implementing practical skills, entrepreneurship, research and integration of basic and applied knowledge in the agriculture sector. Sokoine University of Agriculture is the only agricultural university and second oldest public university in Tanzania. It is renowned, as a world class agricultural university in the region. The Faculty of Agriculture has grown to become one of the largest in East, Central and Southern Africa. Sokoine University of Agriculture is proud to have initiated several programs that have been transformed to university-wide directorates and institutes. Hence Sokoine University of Agriculture's involvement in the Training of Trainers Course on "Everything you have ever wanted to know about sweetpotato" will enable the staff and participants to further strengthen its capability to contribute responsibly to the needs of the national economy and transform the lives of rural households. It is hoped that Sokoine University of Agriculture's partnership with RAC to build capacity of national implementing agencies in Eastern and Central Africa will bear fruit and yield technically strong and cost-effective training interventions that drive up-scaling and out scaling of OFSP in the region.

RAC and SUA signed an agreement to deliver the 10-day training course. SUA agreed to champion the RAC agenda in Tanzania during and after the project and is expected to take lead in organizing and conducting the RAC 10-day training course in the future. It is planned that in:

**Year 1** of the project, RAC will lead the process of organizing and conducting the course. The national counterparts from SUA /DAEA will participate during the process and support the efforts of the RAC project.

**Year 2**, the national counterparts will take lead in organizing and conducting the training. RAC will backstop the national counterpart efforts.

**Year 3**, the national counterparts will organize and conduct the course on their own. The RAC project will only offer partial financial support. It is planned that after Year 3 of the project, the course will be run on a full-cost recovery basis.

This report is a deliverable established under the contract signed between RAC and DAEA/SUA and refers to the Year 1 course that took place from 19<sup>th</sup> to 30<sup>th</sup> November in Morogoro, Tanzania.

## 2. Implementation of the course

The project prepared and delivered the ten day training course as planned. During the preparation phase several planning meetings were held between Sokoine University of Agriculture/DAEA, and CIP, to clarify roles and responsibilities, and ensuring that all the materials necessary for the training were in place. OFSP fields were also prepared for practical work. Visits were made to the training venue to ensure that the conference room had enough space for the participants and that the facilities were adequate. Facilitators also visited the fields to inspect demonstration plots. It was realized that it was not possible to get enough roots in November 2012 for some practical activities during the course. Hence, OFSP roots were acquired from Zanzibar and Geita district through project collaborators.

#### 2.1 Pre-training session

A 5 day pre-training session was held from 12<sup>th</sup> to 17<sup>th</sup> November 2012 in Morogoro. A total of 16 facilitators attended the pre-training (6 from SUA, 3 from SRI-Kibaha, 1 from HKI and 6 from CIP-RAC). During the pre-training facilitators were paired (national and CIP-RAC/HKI), assigned topics, and jointly developed session plans and rehearsed the course delivery process for their module. In addition, the facilitators were enlightened on the TOT delivery methodology, facilitation skills and adult learning methodologies among other topics. The pre-training also clarified grey areas in the manual before the actual training.

#### 2.2 Participants

The 10 day Training of Trainers course was delivered from 19<sup>th</sup> to 30<sup>th</sup> November 2012 in Morogoro. The course was advertised in the local newspapers in Tanzania as well as through CIP and RAC networks. A total of 30 participants attended the course, 12 (40%) of which were women. Of these, 10 participants (3 from Kenya, 3 from Rwanda and 4 from Tanzania) were sponsored by ASARECA while RAC sponsored 20 participants from Tanzania. Participants came from different types of organizations (Table 1) and most were already involved in programs to promote orange-fleshed sweetpotato varieties among farmers in their countries. The list of participants is included in Appendix 1.

**Table 1:** Number of participants by type of organization

Type of organization	Number of participants	Sex M=male F=Female	% in relation to total number of participants
Private companies	2	1=M; 1=F	6.7
NGOs	6	4=M;2=F	20
Agricultural Training Institute	2	1=M;1=F	6.7
Local government and regional authorities	6	5=M;1=F	20
Agriculture Research institutions (ARIs)	9	2=M;7=F	30
Universities (agriculture and agri-business)	5	5=M	16.7
TOTAL	30	18=M;12= F	100%

#### 2.3. Facilitators

The course was jointly delivered by CIP, HKI, SRI-Kibaha and Sokoine University of Agriculture (Table 2); with CIP leading the course delivery. A total of 19 facilitators were involved and 9 of these were from the national program (SRI-Kibaha and Sokoine University of Agriculture). Facilitators teamed up to deliver the various topics of the course modules. The combination of very experienced sweetpotato scientists from CIP, HKI and SRI-Kibaha, and very experienced lectures from SUA provided a very strong foundation for the planning and delivery of each module.

#### 2.4. Venue

The course was held at Top Life hotel, Morogoro (2 Km from Sokoine University of Agriculture (SUA) where lecture hall, accommodation and meals were provided. All practical sessions were conducted at Sokoine University of Agriculture where orange fleshed sweetpotato fields were planted and cooking and other postharvest facilities were available. The university was in session during the period the ToT was conducted hence the choice of the nearest reasonably priced hotel to SUA.

**Table 2.** List of facilitators and areas of expertise

Name	Area of expertise	Institution
Kiddo Mtunda	Sweetpotato breeding	RAC & SRI-Kibaha
Robert Mwanga	Sweetpotato breeding	CIP Uganda
Agili Sammy	Sweetpotato production and dissemination systems	CIP Nairobi
Silver Tumwegamire	Sweetpotato Breeder	CIP Uganda
L. B. Mbilinyi	Plant Pathologist	SUA
Marton Muhanna	Sweetpotato Protection	SRI-Kibaha
Hilda Munyua	Communication & Training Specialist	CIP/RAC
Luka Wanjohi	IT Specialist	CIP Nairobi
Godfrey Mulongo	M&E Specialist	RAC
Kirimi Sindi	Impact Assessment Specialist	CIP Nairobi
Daniel W. Ndyetabula	Marketing & Entrepreneurship	SUA
Mariam Kilima	Sweetpotato Postharvest & Value Addition	SRI-Kibaha
Irene de Souza	Sweetpotato Postharvest & Value Addition	Polpa Alaranjada, Mozambique
Joyce Lymo-Macha	Gender Specialist	SUA
Margaret Benjamin	Nutritionist	HKI
Joseph Masimba	Marketing & Entrepreneurship	SUA
Anna A. Temu	Postharvest & Value Addition	SUA
Ernest Likoko	Postharvest Value Addition	SUA
Jonathan Mkumbira	Sweet potato production	RAC

#### 2.5. Content of the course

The content of the course followed the Reaching Agents of Change ToT Training Manual (June 2012) "Everything you ever wanted to know about sweetpotato". Unlike the similar course which was conducted in Mozambique, the ToT in Tanzania had two additional modules: 1) Sweetpotato Knowledge Portal and 2) Entrepreneurship. Thus the modules covered during the course included:

- 1. Importance of Sweetpotato
- 2. Sweetpotato Knowledge Portal
- 3. Sweetpotato Production and Management
- 4. Sweetpotato Varietal Selection and Characteristics
- 5. Sweetpotato Seed Systems
- 6. Pests and Disease Management
- 7. Harvesting and Post-harvest Practices
- 8. Orange Sweetpotato and Nutrition
- 9. Gender and Sweetpotato Production, Utilization and Marketing
- 10. Sweetpotato Marketing
- 11. Entrepreneurship
- 12. Monitoring of OFSP Dissemination and Uptake
- 13. Facilitation skills and Adult Training Techniques

The daily program of the course and facilitators involved in each module are

presented in Table 3. Based on the ToT Training Manual detailed daily session plans were prepared by the facilitators during the pre-training (Appendix 2).

		to capture lessons learned	

#### Participant action plans

On the last day of the course participants submitted "Action Plans" that they had developed outlining how they plan to apply the skills and knowledge they had acquired at this 10 day TOT. A consolidated table of these action plans is in **Appendix 6**.

#### 2.6. Participants' test results

Participants were given a test on the first day of the course (Pretest) to assess their knowledge about sweetpotato. The same test was conducted on the last day of the course (Posttest) to assess if their knowledge of sweetpotato had improved following attending the 10 day ToT on "Everything you ever wanted to know about sweetpotato". A total of 28 participants wrote the test on the first day (two came later after the test had been administered). A total of 29 participants took the last test (one left early to attend to a sick relative).

The pretest results are presented in Tables 4a and 4b and Figures 1a and 1b. Almost half of the participants scored close to or above average which indicates that most of the participants had some knowledge of sweetpotato. In total, 11 (5 Females) participants scored above average. The pretest results show that female participants had better knowledge of sweetpotato than men (Table 4b). This is also reinforced by the fact that the best two participants on the pretest were females (Figure 1a). Thus, despite the fact that the participants were not fulltime sweetpotato farmers, the pretest results indicates that sweetpotato, which is mostly grown as a food crop, falls in the domain of women.

For the posttest, all participants, except one, scored higher marks (above 50%) (Figure 1b) compared to the pretest. The mean, maximum percentage scores were much higher than those for the pretest with a difference of 24 and 11 respectively (Table 4a). There was no change for the minimum percentage score due to one participant from Rwanda who had difficulties comprehending the course in English. Thus the results clearly show that the participants had improved their sweetpotato knowledge tremendously as a result of attending the 10 day ToT course on "Everything you ever wanted to know about sweetpotato".

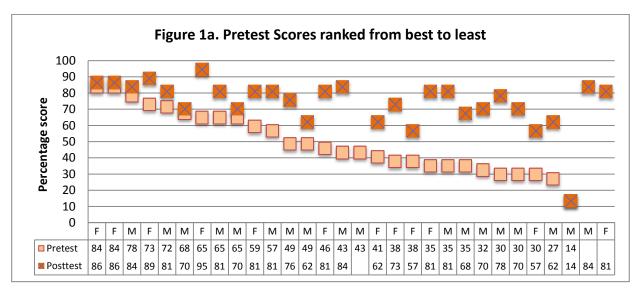

It is worth noting that the female participants had higher mean, maximum and minimum percentage scores than the male participants in the posttest (Table 4b). The first four best participants were females (Figure 1b) on positions one and two.

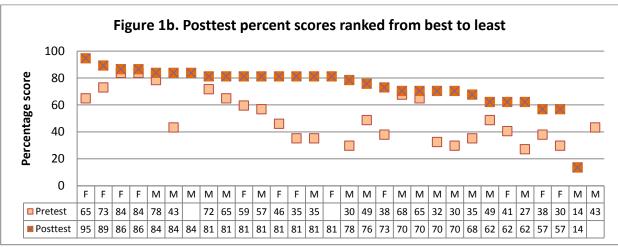

Table 4a: Participants' Mean, maximum and minimum percentage scores for the pre and post tests

	Pretest (at beginning)	Posttest 2 (at end)	Difference (%)
Number of	28	29	
Mean % score	49	74	
Maximum % score	84	95	
Minimum % score	14	14	

**Table 4b:** Participants' test results by sex

	Gender	Pretest	Posttest	Difference
Number of	Female	11	12	
participants	Male	16	16	
Maan 0/ aaana	Female	54	77	24
Mean % score	Male	49	75	27
Maximum % score	Female	84	95	11
Maximum % score	Male	78	84	5
Minimum % score	Female	30	57	27
Willimmum % score	Male	27	62	35

#### 2.7. Course materials

Course materials given to each participant at the beginning of the course included:

- The manual "Everything you ever wanted to know about sweetpotato" Reaching Agents of Change ToT Training Manual;
- Folder with RAC Brochures
- Course program
- Notepad, Pen and pencil
- Bag, t-shirt and cap
- 2010 Catalogue for Orange fleshed sweetpotato for Africa
- Swahili version of "What is damaging my sweetpotato? A field guide for farmers on pests and diseases of sweetpotato"

A number of materials required during the practical sessions were also given to the participants during the course sessions. At the end of the 10 day course all PowerPoint presentations, videos used and pictures were shared to participants through Drop box.

#### 3. Evaluation of the course

## 3.1. Evaluation by participants

Participants' responses to the end of course evaluation indicate that they were very satisfied and happy with the whole process of organizing and conducting the course as well as the content and outcomes. There was strong agreement (over 90%) that the knowledge and skills obtained from this training was relevant to their livelihood and will help in sweetpotato production, utilization and marketing. A similar level of agreement was accorded to the facilitators' level of knowledge on the different topics they handled, presentation clarity and confidence when delivering their respective modules, and giving the participants opportunity to ask questions as well as providing satisfactory answers to the questions asked. The participants also agreed (over 70%) that there was enough time allocated to the course and had enough opportunity to practice the skills as opposed to hearing about them or just watching them being demonstrated. This led to their high level (80.7%) of understanding of the course content. Over 75% of the participants felt the timing, length and venue of the course was convenient.

With respect to course content, the participants found it to be adequate. They were confident that the training will translate into improved OFSP production (79.8% level of agreement); increased OFSP processing and utilization (73.9% level of agreement); and increased OFSP marketing (78.3% level of agreement). The participants indicated that this will be possible, among others, if: 1) there is adequate availability of clean planting materials, 2) the knowledge acquired is implemented and 3) there is good promotion and sensitization of OFSP.

Overall, the participants found marketing and value addition of sweetpotato to be most useful followed by sweetpotato production and management as well as sweetpotato seed systems. However, the participants felt that the course would be improved if there was more time and better time management as well as more practical sessions. This would increase their participation during sessions and facilitate exchange of ideas among participants. Despite this, there was high agreement that the course was relevant and it met their expectations; and that the course objectives were well communicated to them.

Results of course evaluation by participants as well as their daily reflections are presented in Appendix 4.

## 3.2. Evaluation by facilitators

The facilitators were pleased with the course, especially that it involved a different approach in delivery. They appreciated learning and experiencing adult leaning methodology, facilitation skills as well as session planning. They were further delighted with the zeal and active participation of the participants in each and every aspect of the course, from the first to the last day of the course. They noted that the participants showed they enjoyed the course by their active participation and involvement during the entire course.

The facilitators felt that the course was well designed and that there was a good balance between practical and theory sessions. They further noted that the TOT training manual for this course was well written and had all the relevant details to guide facilitation of the course. They however, noted that there were some few areas that were missing in the manual that need to be added. These include: weed management, integrated pest management (IPM), sweetpotato knowledge portal, and entrepreneurship. The national facilitators were particularly happy with the presence and twinning with well experienced CIP facilitators in preparing and delivering the course. This facilitated their learning and preparedness to deliver the next course when they will take the lead.

9:30 -10:00	Lecture room	Opening session	30 min	Each participant presents him/herself to the group referring to his work and professional experience		Anna Temu Hilda Munyua Kido Mtunda	
10:00 - 10:30	Group photogr	aph & Tea/Coffee break					
10:30 - 12:00	Lecture room	Participants expectations	5 min		Facilitators hand on post-it or cards and markers to participants	Hilda Munyua Jonathan Mkumbira Godfrey Mulongo	cards/posts-it and markers

			10 min	Participants write their expectations on cards	Facilitators give instructions for participants to list 5 things they expect from the Facilitators group cards	Hilda Munyua Jonathan Mkumbir Godfrey Mulongo	Flipcharts
					by common aspects in flip-charts		markers, bostik
		Course overview and learning objectives	30 min	Participants comment and get clarifications on program	Facilitator present the program for the course; comment on expectations that will be met and the ones that will not be	Jonathan Mkumbir	Power point , flipcharts, markers, bostik
		Benchmark Assessment	35 min	Participants write sweetpotato knowledge	Facilitators hand in test	Jonathan Mkumbir Hilda Munyua	knowledge test,
12:00 – 13:00	Lecture room	Brain storming and lecture on Sweetpotato history, importance, trends in production and utilization and problems faced by farmers	60 minutes	Participants brainstorm and listen to the lecture presentation	d Lead the brainstorming session and latter presents a lecture	Kiddo Mtunda	Computer, power point presentation
13:00 – 14:00	Lunch Break				<u>'</u>		
14:00 – 16:00	Lecture room	Brainstorming: What is a balanced diet?	15 minutes	Participants share their ideas on what is a balanced diet	Facilitator moderate brainstorm	Margaret Benjamin	
		Presentation: What is good nutrition?	45 minutes	Participants take note of the explanation and make questions	Facilitator presents the topic, based on the manual and answer any questions from the participants	_	omputer, power point resentation
16:00 – 17:00	SUGECO Processing facility	OFSP Processing	60 minutes	Participants process different varieties of OFSP into chips and place them on a drying rack	Facilitator explain what should be done and monitor the activity	Kiddo Mtunda ba	FSP roots, knives, asins, water, chipping achine, drying rack

Course:	Everything y	ou ever wanted to	know abou	ıt swee	tpotato		Period:	19 - 30 November, 2012
Day	2	Date	19 Novembe	er	Торіс	Different varieties of sweet	potato an	d their characteristics
Intended Learr	ning Outcome	es	A:	Unde Knov Be al Unde Unde Be al	w about the key che to help farmer erstand that varied erstand why care of the to conduct a v	ences between sweetpotato naracteristics of at least 3 sv	weetpotat istics they en people ant for swe d, yellow a	o varieties suitable for their area/ region are looking for in a sweetpotato variety eetpotato and green cards)
Duration:			3	hours 1	10 minutes			

Hours	Location	Activities	Duration	Instruction for facilitators	Reconneihility	Materials required
11:15 - 12:45	Field	Field Walk:	10 min		Robert, Kido, Jonathan	

of different sweetpotato varieties in field		different sweetpotato varieties in a nearby Field a) Foliage (20 min) b) Roots – dig up carefully   (20 min), i) beta-   carotene evaluation for storage, ii)for taste test   iii) storage c) Each group to demonstrate on-farm data taking (20 min)  Conduct a taste evaluation	Guide the participants to use the descriptors. Let each pair work on two varieties. Guide the participants on: a) Foliage b)Choosing roots for i)betacarotene determination ii) taste test iii) storage Guide the participants on data taking for on-farm trials  a) Do the cooking in advance b) Explain to the participants the taste test protocol i) individual evaluation ii) group evaluation	and Robert Robert, Kido,	Pencils, erasers, participants notebooks, hoes, knife, color chart, handouts a) on sweetpotato descriptors b) Sample farmer contract for on-farm trial c) Form 4B. SP pre-harvest d) Form 5A. Farmer participatory field evaluation e) Form group ranking field performance f) Form 5B. Farmer participatory taste evaluation g) Form group ranking consumer acceptability/roots  Storage roots of the taste evaluation, cooking stoves and fuel, pans, water,
Group discussion (back in Class) on key factors differentiating sweetpotato varieties	20 min	Group discussion on key factors differentiating sweetpotato varieties and which are important for which reasons	factors	Robert, Kido, Jonathan	matches, knives, taste test forms, pencils, flip chart, markers, Plenty of color cards (green, yellow, red), many bags for the bags Flip Charts, markers

Participants create promotion posters / training materials	20 min	Participants create promotion posters / training materials for the main sweetpotato varieties grown or suited to their location	Guide the 5 groups each to produce posters/training materials	Kido, Jonathan and Robert	Flip Charts, markers
Presentation summary	20 min	Presentation summarizing: the natural diversity of sweetpotato; defining characteristics of different sweetpotato varieties; methods for on- farm testing of different sweetpotato varieties	Ask, add, comment on presentation	Robert, Kido and Jonathan	Powerpoint, flip chart, markers

# Appendix 4. Course evaluation and reflections by participants

### **COURSE EVALUATION**

1. Which aspects of the training did you find most useful?

Topic	Frequency	Percent
Orange-fleshed sweetpotato and nutrition	1	3.3%
Sweetpotato seed systems	3	10%
Sweetpotato production and management	4	13.3%
Sweetpotato pest and disease management	2	6.7%
Harvesting and post-harvest management	2	6.7%
Marketing and value addition	13	43.3%
Processing and utilization	2	6.7%
Missing	3	10%
Total	30	100%

2. Which aspects of the training did you find least useful?

Topic	Frequency	Percent
Gender and diversity aspects	2	6.7%
Processing and utilization	1	3.3%

	Level of	Remarks/Explanation
Items	Agreement	
4. Will the knowledge and skills from this training		
help you in your sweetpotato production,		
utilisation and marketing?	93.8%	
5. What level of understanding did you have	00 70/	
regarding the course content?	80.7%	_
6. Was the course information relevant to your livelihood?	90.3%	
7. Was enough time allocated for the course?	72.4%	
8. How would you rate the facilitators' level of knowledge on the topic?	93.8%	
9. Were the facilitators clear and confident in their tasks and presentations?	93.8%	
10. Did you have enough opportunity to practice the skills as opposed to just hearing about them or watching them being demonstrated?	77.8%	
11. Were there enough opportunities to ask questions?	94.5%	
12. Were satisfactory answers given by the facilitators?	92.9%	
13. Were the timing, length and venue of the course convenient?	75.7%	
14. On a scale of 1 (low) to 10 (high), how confident are you that the training will translate into: - improved OFSP production? Please briefly explain your answers.	79.8%	<ol> <li>Content taught was adequate-48.3%</li> <li>More practicals to increase competency-6.9%</li> <li>Depends on availability of clean planting materials-13.8%</li> <li>Depends on stability of climate-3.4%</li> </ol>
		<ul> <li>5. Depends on availability of funds-3.4%</li> <li>6. Spreading the knowledge acquired to others -6.9%</li> <li>7. Depends on perception and adoption by clients-3.4%</li> </ul>

15 increased OFSP processing and utilization?	73.9%	<ol> <li>Inadequate time for practicals-3.4%</li> <li>Gained adequate knowledge-10.34%</li> <li>Creation and demonstration of OFSP products - 6.9%</li> <li>Linkages between different stakeholders - 3.4%</li> <li>Implementation of the knowledge acquired - 10.3%</li> <li>Increasing production-3.4%</li> <li>No recipes for some products-3.4%</li> <li>More investment needed-3.4%</li> </ol>
16 increased OFSP marketing?	78.3%	<ol> <li>Training more people -6.9%</li> <li>Promotion or sensitization-13.8%</li> <li>Knowledge acquired-6.9%</li> <li>Role playing by policy makers-3.4%</li> <li>Marketing technology deliverance-3.4%</li> <li>Producing different products3.4%</li> <li>Inadequate time3.4%</li> <li>Knowing the importance of the crop3.4%</li> <li>No marketing practicals3.4%</li> <li>Up scaling needed-3.4%</li> </ol>

# How could a training course like this **be improved**? 16.

Recom	mendation	Percentage (Multiple
		response possible)
1.	Increase time/ Time	34.5
	management	
2.	More practicals	31.03
3.	Increase funding	3.4
4.	More exchanging ideas btw	
	participants	6.8
5.	Adverts in media	3.4
6.	Availability of training facilities	
	in practical fields	3.4
7.	Increase participation during	3.4
	sessions	6.8
8.	A little better planning	
9.	Shorten days	3.4
10	. More energizers	3.4

## Others

	Level of
Items	Agreement
I was well informed about the course objectives	91.1%
Course was to my expectations	86.4%
Course was relevant	92.4%
Course objectives were clear to me	88.6%
Course activities stimulated learning	93.6%
Activities gave sufficient practice	83.4%
I always received feedback from facilitators	80.8%
Course activities were simple	71.7%
Time allocated for each activity was adequate	66.4%
All my questions were responded	89.0%
Accommodation was of good quality	72.4%
Food was of good quality	67.7%
Quantity of food was sufficient	76.6%
Resting time was sufficient	64.8%

#### **Appendix 5:Participants Fears and Expectations**

## **Expectations**

- To have knowledge on production of OFSP
- Knowledge on value chain addition through processing
- Capacity building on how to deliver the knowledge attained through the course to producers / farmers
- Entrepreneur skills
- To know everything concerning production to utilization of the crop
- To know pests and diseases of sweetpotatoes
- Some knowledge of value chain in respect to sweetpotatoes
- To be equipped with knowledge on sweetpotato production along the sweetpotato value chain
- To get to learn OFSP better
- To learn new recipes
- Get equipped with knowledge on OFSP value chain sustainability
- Understand the best model of exit strategy towards the close of any OFSP project
- Acquire more knowledge and skills on OFSP how it is processed, multiplied etc.
- Have knowledge which I can transfer to many Tanzanians about Vitamin A
- To start demo plots and points to display utilization of sweetpotato products.
- Learn more about OFSP
- How obtaining planting materials
- OFSP diseases
- How storing OFSP roots for long time
- Learn more about processing
- Packaging of products
- Marketing
- Value chain
- Certificate of the training
- To gain knowledge on sweetpotato production and utilization
- To improve my well-being (reasonable allowances for upkeep)
- Thorough understanding of the background, importance and trend of OFSP
- Enables me and my colleagues to foster the agricultural investment and OFSP in our communities
- As lobbyist and advocacy through G.As to enhance policy change as to priorities OFSP investment
- Increase consumption of OFSP in my family to prevent Vitamin A deficiency
- I expect to be well equipped with all the packages from selection of vines (production) to consumption (value chain)
- Issues will be discussed very clearly and broadly then the problem of Vitamin A will be reduced in the society
- Acquired knowledge from the TOT will be provided to other stakeholders famers
- Funds will be supplied to the TOT for further trainings
- I expect to come up with a thorough / clear understanding of sweetpotato and its value chain
- To become ambassador or agent in dissemination of the knowledge and skills which I shall acquire
- To come up with thorough knowledge on the sweetpotato production and marketing
- To know more on value chain and be able to train others in my area after completing the course
- To gain knowledge on sweetpotato production, processing, utilization and marketing especially OFSP. This
  knowledge will assist me to motivate farmers to adopt more OFSP varieties to improve nutrition status as well
  as improve livelihood.
- To know everything about OFSP
- To know everything on value chain and OFSP
- To know the value chain of sweetpotato
- Proper coverage of the planned topic
- How to get planting materials on time
- To know the demand for OFSP in Tanzania and how long
- To get knowledge on various issues on OFSP
- To learn more and acquire new skills and knowledge
- I expect that the goals and plan of this course to be met

- To know OFSP production
- Know many products from OFSP
- Making OFSP a business
- To get enough knowledge about production and processing of OFSP
- I am expecting to gain a full knowledge and understanding about OFSP value chain that will enable me to engage myself in entrepreneurial perspective
- To learn more about OFSP
- To gain skills on how to up-scale OFSP in my home country
- To make professional friends
- To know the demand for the OFSP in Tanzania and how long will demand match the supply
- Value chain of OFSP

### **Fears**

- To get the knowledge and fail to implement or fail to reach the expectations because sweetpotato is not given priority in the districts
- Will the products be accepted? Kwa sababu ukila viazi gesi inakuwa nyingi kwa tumbo
- Sustainability of RAC OFSP initiatives production and demand
- Awareness of OFSP knowledge in our East and Central African countries
- Time may be short to cover everything.
- Program running to Friday 30<sup>th</sup> when we are travelling back
- I fear that the time allocated for the whole course may not be enough provided that a lot of matters has been covered
- Time is not enough because I want to know each and everything about sweetpotatoes
- Given the hand-out manual is a bit bulky I am not sure if we will cover it all in 10 days
- Time to cover all topics effectively and timely
- The course may not be properly covered due to time lag in starting (time management)
- Will time be enough to cover the timetable content thoroughly?
- 10 days are not enough to learn production, value chain, processing, nutrition
- We are adults. I do not know how much pocket money should be offered.
- Though the days are many, my fear is that we may be carried away by this length of time and do things slowly thus end up being time barred
- I fear I may miss out on the activities of 30<sup>th</sup> November due to conflict in time between flight and the day's activity.
- Kujuwa OFSP
- Too long training
- Adhering to adult learning methodology takes a whole day
- Time may be short for other topics to be covered efficiently
- The course may be too short to capture all what is intended to be delivered
- Value chain is long and very important and practical. I do not think that we can finish in the days we have.
- The course content might not be covered as planned.
- Transportation and accommodation facilities
- I am not sure if the course will fulfil the problems of Vitamin A deficiency because of the policy of the country
- The local government they don't know the importance of OFSP
- I am wondering whether we shall get a certificate for the course
- Slow adoption of OFSP technologies among the community
- A long time to be taken many years for the OFSP to be properly grown in many areas within our country
- In some areas they have never seen OFSP
- Low investment in OFSP to all stakeholders into practices
- Education to farmers in rural areas not well addressed

# **Appendix 6:Participants Action Plans**

Name	Gender	Organization	Reasons for taking course	Plan after completion	Name of planned course	Start date of course	End date	Target Audience	Challenges/barriers to address	Expected outcomes	No. of people to train	Training support team	Tentative source of funding
Festo Seheye	Male	Mati IlongaTraining Instute-Kilosa	Acquire knowledge on everything about sweetpotato (OFSP)	Incorporate OFSP in root and tuber syllabi for my students, multiply planting materials	Root and tuber crops production	Feb-13	May-13	Certificate and Diploma students	Drought and availability of enough planting materials	My students will practice and teach farmers production and utilization of OFSP	170 Certificate and 27 Diploma students	Department of crop science members	Principal- Mati Ilonga - Kilosa
Dominick E Pingo	Male	RECODA- Research, Community & Org. Dev. Associates											
Winza Amos Nzaga	Male	Ministry of Agriculture Training Institute- Ukiriguru	Expanding the knowledge on sweet potato	Utilize the knowledge by training others and practice in one of the areas taught	Understand sweet potato the OFSP variety	10/12/2012	15/12/2012	Students from MATI-Ukiriguru, Agricultural extension officers, fellow tutors	Costs, convenient dates, OSFP variety and clean plant material availability	Awareness of OFSP in MATI-Ukiriguru	80	Extension and catering officers	Donors
Laurian Lameck	Male	SUGECO	Learn about SP production, marketing and importance of the product	Take the course in an entrepreneurial way and reach trainees	SP production, vine multiplication and market value chain	4/2/2013	7/2/2013	Extensionists and big farmers of SP	Lack of flexibility, funding resources, poor marketing facilities/storage mechanism	They will train more farmers on OFSP	10	Production and management facilitator, post harvest person,	CIP, RAC, Government of Tanzania
Julius Mwinuka	Male	SUGECO	Sensitize on the importance of OFSP to different stakeholders	Create awareness and train on OFSP	Nutritional and economic benefits of OFSP	16/01/2013	18/02/2013	Extensionists and nutritionists	Lack of knowledge on OFSP, nutritional and economic benefits of OFSP	Awareness generation	10-30 people	TAPP, RAC, NGC	

Elizabeth Peter Mpayo	Female	Ministry of Agriculture Food Security & Cooperative	Help in OFSP production and to teach others	Train others about production of OFSP	OFSP production for food security, income generation and health	7-Jan	14-Jan	Economists, Traders, NGO's, farmers, teachers, village and ward executive officers	Seed multiplication, marketing value addition, diseases and pests, gender issues, storage	Skilled people and high production of OFSP	100-150	Nutritionist, economist, community development officer, cooperative officer	CIP, DED(DALDO), NGO's
Charles M Sagenge	Male	T.A.H.E.A- Tanzania	Improve knowledge on sweetpotato production and use of vitamin A and products	Train other stakeholders on OFSP growing and eating	Zalisha zaidi viazi lishe ili uongeze kipato na kupata vitamin A	15-Dec-12	15-Jan-13	NGOs, extension officers, government leaders, stakeholders		Planned stakeholders to achieve the knowledge	100	TAHEA, Health, medical and development officers.	RAC, CIP, DED/DALDO
Yusuph Mohamed	Male	Temeke Municipal Council	Gaining knowledge, experience and skills on everything about OFSP	Implement crop cultivation, equip small entrepreneurs to process the SP product	SP for poverty eradication and vitamin A improvement	15-Feb-13	20-Feb-13	Farmers, extensionists, entrepreneurs, nutritionists and researchers	Financial resources, willingness of participants, demonstration plots for practical approach	Understanding better issues relating to SP	15	Entrepreneurs, Researchers and extensionists	NGOs, Government agencies, RAC-CIP and private institutions
Akida Ignas Meya	Male	Ulanga District Council	Understand everything about OFSP	Conduct TOT course to extension officers	OFSP cheap and affordable solution to vitamin A deficiency problems	10-Jan	28-Jan-12	Agricultural extension officers, nutritionists, food scientists, community development officers ,food processors, NGOs	Funds and availability of training materials	Increase awareness on OFSP nutritional value, increased consumption and production of OFSP	87	District nutrition officer, economist, community development officer	District council, Ministry of agriculture, Mwanzo bora project, CARITAS- MAHENGE DIOSSIS

Edith Munganyinka	Female	Africare	Improve knowledge on sweetpotato, conduct training	Organization of a TOT at cooperatives of PLWA	Everything you have ever wanted to know about sweetpotato			Management committees of cooperatives, field agents	Insufficient clean planting material and knowledge in food processing, behaviour change in using SP units	Participants will know how to get cleaned planting materials, identify viruses and diseases	25	Nutritionists, Agronomists	
Ihuya M. L. Zephania	Male	Kimkumaka	Gaining knowledge and skills on OFSP aspects and train others	Train others on aspects of OFSP	Trainers capacity building on OFSP	Dec-12	Feb-13	Agricultural extension officers, community development officers , NGOs	Funds and resources for conducting the training	Improve knowledge and skills of participants	50-100	Skilled entrepreneurs, nutrition and marketing officers, community and social workers	DED/DALDO, NGOs, RAC,
Mary Mkunde Bonaventure	Female	Regional Administrative Secretary Office - Dodoma	Acquire knowledge on OFSP, educate regional and district teams	Create awareness on orange fleshed sweetpotato	Sensitization on OFSP to the regional secretariat team and 3 LGAs in Dodoma region			Regional top officials, Regional top secretariat team, NGOs, politicians, nutritionists		importance and awareness on OFSP will be improved	70	Researchers , RAC, Nutritionists, agricultural cooperative and business officers, crop and horticulturalists	RAC, NGO, LGA, DED/DALDO, private institutions
Donald Betwala	Male	SUGECO	Understand importance of sweetpotato	Implement acquired knowledge and skills and deliver to others	Reaching agents of change training of trainers course	18-Feb-13	22-Feb-13	DED, NGOs, Extensionists, CBOs and SP entrepreneurs	Training facilities, funds	Increase awareness on OFSP, build entrepreneurial spirit to foster consumption of OFSP	20-30 people	Sokoine university team, Sugeco team	
Lucy M. Maziku	Female	DAI-IMARISHA	Learn on OFSP and sensitize partners on how to reduce VAD through production of OFSP	Conduct training on household nutritional strengthening	Household gardening and nutritional strengthening	Mar-13	Nov-14	Extension officers, TOTs, volunteers		Reduce VAD, increase incomes at household levels and increase production of OFSP	200-800 TOTs	Technical staff in our organization, extension officers	DAI-IMARISHA sharing cost with partners

Elias Lwekaza	Male	SUGECO	Acquire knowledge on potato production and value addition	Take the course in an entrepreneurial perspective and train others	Marketing and value addition	1-Mar-13	3-Mar-13	Extensionists, large farmers, traders, entrepreneurs	Poor marketing strategies, lack/ non value addition	Increase in trade volumes, value addition and profit margin to farmers	10	Entrepreneurship and marketing experts, people doing value addition	Different donors including CIP and RAC
Mariana Hermes Massawe	Female	ARI- Ukiriguru	Increase understanding on OFSP	Conduct training to extension staff and lead farmers	TOT training on orange fleshed sweet potato in the lake zone	14/1/2013	18/1/2013	Lead farmers, extension staff, local NGO's, traders, health development personnel	Source of funds, Uptake of beta carotene,	availability of clean sweetpotato materials to farmers, the intended are trained and knowledge used	25	Entrepreneur, Gender person, Marketing and value chain analyst.	CIP, RAC
Rahila Amour Mohammed	Female	ARI- Ukiriguru	Build up capacity on sweetpotato production, utilization and marketing	Train extension officers on sweet potato production, utilization and marketing	TOT training on orange fleshed sweet potato in the lake region	14-Jan-13	18-Jan-13	Extension agents, BDS, local NGOs	Financial constraints	Scale up the adoption of OFSP to combat vitamin A deficiency	25	Entrepreneurs, Extensionists, NGOs	RAC-CIP
Innocent Lwabuti	Male	RUDDO	Expanding the knowledge on value chain analysis and management	Train public sector extension on aspects pertaining to sweet potato	Promotion of sweetpotato to be an important crop	15/01/2013	19/01/2013	Ward and village agriculture extension officers	Funds availability to facilitate the course	Extension officials to be able to train farmer groups	20	District crops officer, Officer in district development office	HKI, CIP
William Sig Byabato	Male	Geita District Council	Understanding all agronomical practices involved in sweetpotato production	Disseminate the attained knowledge of SP production to farmers	Add your knowledge on sweet potato production	1-Jan	5-Jan	Agricultural extensionists, community development officers, NGOs	Combat vitamin A deficiency, funding of the project	Reduced problem of vitamin A, poverty reduction	10-15 people	District nutritionists	RAC(HKI) and CIP
Charles P Mgeni	Male	Sokoine University	Acquire knowledge on sweetpotato and train others	Participate as a trainer on the next TOT	Everything you have ever wanted to know about sweetpotato			NGOs, Agricultural officers	Importance of sweetpotato and how to disseminate the technology to farmers	Trainers will have knowledge on OFSP and teach the community	20	KIBACHA and SUA trainers	CIP

Caroline Agamala Kundu	Female	KARI-Kakamega	Better understanding of sweetpotato to become a better advocate	Promote and train others in OFSP	Sweet potato for food, income and health	17/6/13	21/6/13	Farmers, community health workers and nutritionists	perception of sweetpotato, diversity in post harvest utilization, production of clean and healthy planting material	Change of perception, commercialization and enhanced intake of OFSP	20	Sweetpotato breeders, government, post harvest specialists	RAC
Habumuremyi JMV		Duhange Cooperative	High school certificate in mathematics and physics	Updated knowledge on sweetpotato to be able to train others				Management	Insufficient planting materials	Improve the quality of sweetpotato preparation	57	CIP, RAC	
Makokha Phabian	Male	Community research in Environment and Development Initiatives	Refresher on OFSP, Avenue to access new knowledge on OFSP	Disseminate and enhance uptake and adoption of sweetpotato knowledge	OFSP for increased initiative and income generation	21/01/13	25/01/13	Farmer group representatives, AEOs, opinion leaders,	Malnutrition, income increase, entrepreneurship	Increased income generation, reduced malnutrition, tapping unexploited opportunities	45	MOA, my NGO staff, MUH	Donata, ASERICA
Isabella Kanaga Ememwa	Female	Kenya Agricultural Research Institute	Learn more about sweetpotato production	Build capacity of TOTs on various aspects of sweetpotato	Improving knowledge and skills in sweetpotato production	13-May-13	17-May-13	Extension staff, NGO staff, health workers	Stereotypes about sweetpotato, gender issues	Participants will have knowledge on various aspects of sweetpotato	20	Value addition specialist, Processor, Agronomist, Socio economist, Crop protection specialist	RAC
Busingye Justine	Female	lbyiringiro Project Copamanya Cooperative	Acquire knowledge and skills on OFSP	Train others	TOT course on everything you wanted to know about sweetpotato	17/12/2012	21/12/2012	Community volunteers,	Insufficient planting materials, low economic status of farmers, malnutrition problem	Sufficient planting materials, improved seed production, economic and nutrition status of farmers	26	Agronomists, Nutritionists, Farmer field school agents	RAC

Stephan E. Ngailo	Male	Sugarcane Research Institute	Acquire knowledge and skills in SP production, processing and utilization	Organize, conduct and participate in training on SP	SP for food security and income	February second week		Extension officers, NGOs and CBO representatives in KBH	Time, finance/funds	Participants be able to realize the commercial and nutritional value of SP	15-20	Pathologist, Agronomists, Nutritionist, Entomologist, Economist, Gender facilitator	RAC/CIP/GoT
Salma Omar Mohammed	Female	Kizimbani Agricultural Research Institute	Improve knowledge on OFSP and its product development	Train other stakeholders on OFSP aspects and in increasing income	Plant OFSP for nutrition as well as income	20-Dec-12	1-Jan-13	Extensionists, NGOs, DVMs and other stakeholders	Availability of funds	All planned OFSP stakeholders will be trained on OFSP	50	Fellow researchers, others from Health institutes and RAC	RAC, CIP, Zanzibar government
Domina Esther Mbela Nkuba	Female	Ministry of Agriculture Food Security & Cooperative - (MATI) - Makuru	Understand everything about OFSP and promote it using skills gained	Transfer the acquired knowledge to others	Everything you have ever wanted to know about sweetpotato	7/1/2013	11/1/2013	Agricultural extension officers , students, CBO/NGO workers	Natural disasters, Filling the knowledge gap on nutritional benefits of OFSP and agronomic practices	Increased vitamin A intake, reduced child malnutrition, reduced food security	177	Social economist, Agronomist, Pathologist	RAC
Ngabo Pamba	Male	Bukoba District Council	Refresher on SP production, utilization and marketing	Train local level TOTs, venture into SP business	Knowledge on sweetpotatoes for improved health and income	21/1/13	25/1/13	NGOs, CBOs, DVMs, Extensionists, Researchers	Knowledge gap in SP production, small SP facilitators in the area	Gain knowledge on SP, Disseminate SP technologies to many partners	30	Socio economist, Nutritionist, Agronomist, Pathologist	ASARECA
Helen-Clara Kiozya	Female	Sugarcane Research Institute - Kibaha	Acquire knowledge on sweetpotato	Ensure production of sweetpotato , proper use of screen houses, available resources and processing equipment	Production and utilization of orange sweetpotato	4th February 2012	8th February 2012	Extension workers, sweetpotato stakeholders, NGO's	Reliable source of clean planting materials, Harvesting sweetpotato, Add value on processed sweetpotato	Reach the target group	20	Agronomist, Economists, Entrepreneurs, Food processors	NGO'S, CIP- RAC, individual farmers
