

# Experiences of Vine Dissemination in Mozambique and Rwanda: Focus on Module 8

**Abdul Naico and Valentine Uwase** 

Maputo, January 31, 2017

## Objective/Rationale

 A core element of all sweetpotato projects is the multiplication and dissemination of vines to households

 Every project needs to monitor how many beneficiaries they have been reached and where those beneficiaries are located

### **Strategies for Vine Dissemination**

1. Mass vine dissemination. large number of recipients come to a central place to retrieve vines

## Strategies for Vine Dissemination, Cont. SASHA

SASHA
Sweetpotato Action for Security and Health in Africa

2. Using controlled mass diss. with partners (alphabetization programs, health centers, specific groups of farmers....)

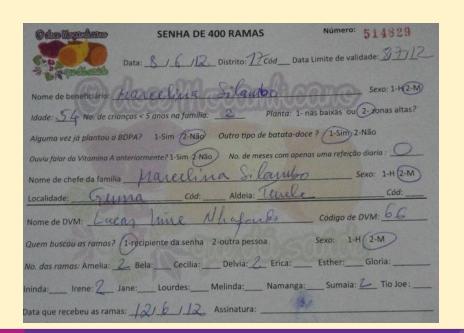

## Strategies for Vine Dissemination, Contaction for Sweetpotato Action for

 3-Vine dissemination using Decentralized Vine Multipliers (use of vouchers)

Security and Health in Africa

## Forms for collecting vine beneficiary information (Module 8)

Typically, there are four types of situations:

- A set quantity of material of 1-2 varieties is provided to every household
- 2) More than two varieties are provided to a household, and the amounts and type of variety may differ by household
- 3) The distribution is done all at once (Mass distribution) with or without the farmers redeeming vouchers
- 4) The distribution is done at the site of a vine multiplier when vine recipients arrive to collect vines on different dates

## Information to be recorded on the forms Sweetpotato Action for Security and Health in Africa

- COUNTRY: Please fill in the country code. Reference list provided
- **ORGANIZATION.** Write down the name of the organization. CIP will have the code of 0001. Make a code sheet for the key organizations on your project ahead of time
- MASS DISSEMINATION: If all the recipients on the table received their vines on the same day in a major effort to cut and disseminate the material, fill the box with 1. Otherwise, like for participants using a DVM on different days, fill in zero (0)
- SHEET NUMBER: For each distinct date in a distinct village, the sheet number should be unique. For example, on 2/2/2016 for the village of Sauti, there could be sheet number 0001-0010 capturing 130 vine recipients
- DATE (DAY, MO, YR)

## Information to be recorded on the formsshaped Sweetpotato Action for Sweetpotato Action for Security and Health in Africa

- COUNTY (ADMIN1CD). SUB-LOC (ADMIN4CD). VILLAGE (ADMIN5CD).
- Line 3.
- NAME OF MULTIPLIER OR VINE SOURCE. Before beginning the dissemination exercise, assign each vine multiplier or institution (extension service, agricultural school, orphanage) multiplying material a code not exceeding four digits. Write out the name in full (first name + last name) and its code on the form.
- NAME OF MONITOR OR EXTENSIONIST. Often there is a change agent (extension agent, scientist) present to help with the dissemination. These agents should also be given codes. Write out the name in full (first name + last name) and its code on the form.
- Line 4.
- VARIETY #1. Write out the name in full (e.g. Sumaia) and its code on the form. The list of variety codes is provided in Appendix B.
- AMOUNT DISTRIBUTED PER PERSON/HOUSEHOLD AND ASSOCIATED UNIT.
- LABELED? All quality material (pre-basic, basic, quality declared) should be labeled, with
  the name of the variety, the date received, and the contact information for the multiplier or
  other source of planting material. Fill in the box with 1 if labels are in use.

### Information to be recorded on the forms

• IS THIS QUALITY DECLARED MATERIAL? Increasingly countries are adopting regulation to improve the quality of vines being distributed as planting materials. If the source of vines (multiplier or organization) has had the field inspected for quality, fill in the box with 1.

Line 5: VARIETY #2 ( same inf. As for variety VARIETY #1)

#### IN THE TABLE

- **Column 1. No.** Number of the recipient for this sheet. The first line will be 1, the second 2, until there are no more recipients.
- Columns 2 & 3. Date of Redemption. For those receiving materials from DVMs, record the day, then the code for the month (i.e. 2=February) reflecting the day the vines were given to the recipient.
- Column 4. Head of Household: First & Middle Name. Having a complete name will help locate the household in the
  future. Write out the full first and middle name of the head of household. Do not use initials.
- Column 5. Head of Household: Last Name or Family Name. Write out the full surname of the head of household.
   Verify that it is the surname, not the first name.
- Column 6. Sex of Head of Household. We are committed to collecting gender disaggregated data. Please note the sex
  of the head of household: 0 for female; 1 for male.

### Information to be recorded on the forms

- Column 7. Female Caregiver: First and Middle Name. In cases where we are targeting households with pregnant women or those with children under five or two years of age, write the first and middle name of the mother here. If this person is the same as the head of the household (i.e. it is a female-headed household) write the word SAME. If there are no selection criteria, write the first and middle name of the wife of the head of household
- Column 8. Female Caregiver: Write out the full surname of the female caregiver, even if it
  is the same as the last name of the head of household.
- Column 9. Leads Sweetpotato Growing. In follow-up surveys, we often want to speak to the person most responsible for sweetpotato production on the farm. If the head of household is the person responsible (making decisions concerning) the production of sweetpotato, write 1 in the box; if the female caregiver is, write 2. If the household members say both, record 1 for head of household.
- **Column 10. Type**. This column captures any dominant criteria used to select households targeted to receive planting material. If no criteria have been used, that is anyone in the village can receive, the write 0 (none).

## Information to be recorded on the forms

- Column 11. CELL PHONE NUMBER (OWN OR CLOSEST CONTACT).
  - Column 12. NAME OF VILLAGE (if different from above). The village in which the vines are being distributed (noted in the header under AD5) may not be the same as where the recipient household is living. Ask them the name of the village where they live. If it does not match the name under AD5, record the name of the village. Ideally, you will have a code sheet of names and codes of nearby villages before the distribution starts. After filling in the sheet for all recipients, please fill in the code for the appropriate village. Again, this is to assist in locating the household for monitoring follow-up.
- Column 13. TOTAL MONEY RECEIVED. In some areas, vines are being partially or fully commercialized. Note the currency being used at the top of the column. Then fill in the relevant row with the amount of money received from each vine recipient household for the vines. If the vines are free, write 0.
