ANNEX II: THE CONCEPTUAL FRAMEWORK OF THE DETERMINANTS OF NUTRITIONAL STATUS IN TANZANIA

Nutritional status

Dietary intake

Health status

Household food security

Quality of care

Healthy environment, health services

Institutions

Political & ideological framework

Economic structure

Potential resources

Human, biocultural, technological

Basic determinants
The impact that the resources potentially available to the household have on nutritional status is mediated and constrained by overarching economic, political, and institutional structures.

Underlying determinants
Poverty constrains the level of these determinants for individual households.

Immediate determinants

Outcome

Food security resources
- quantity food produced
- quality food produced, diet diversity
- cash income, food transfer

Caregiver resources
- knowledge & access to education
- health status
